Binding Registration for the eTC 2006

Tuesday, September 12, 2006

Herewith we would like to register for the presentation of trail management solutions in the course of „eTC 2006“ at the annual conference of the GMDS 2006 in Leipzig.

We are aware that this is a „guided software demonstration“ and that we have to adhere closely to the outlined scenario concerning our presentation and time frame of the presentation.

Furthermore, we are aware that due to the narrow time frame of the event only a limited number of companies can be accepted. The conference organiser reserves the right only to admit a limited number of announcements whereupon an acceptance is primarily depending on the time of the provisional announcement.

Application deadline for the eTC is June 30, 2006. The participation in the eTC involves the conclusion of a sponsoring contract in the amount of 1000,- Euro. This amount contains 2 vouchers for day tickets to the conference and the possibility to present the software solution in the industry exhibition at the same day.
